

The 'Wish List' is not direct investment advice: we the producers are private investors, not professional investment advisors.

Priszm Canadian Income Fund Removed From Wish List

Notwithstanding the trust's positive quarterly results in 1Q06, we no longer believe that Priszm units represent an attractive mix of risk and reward. We hope to be able to reevaluate QSR.UN on unit price weakness.

*\$11.33 represents a 19.26% ROI year to date excluding taxes, distributions, and commissions. Including three monthly distributions QSR has returned 22.57% year to date.

*\$11.33 represents the bid on QSR.un at approximately 11:09 AM.

Sincerely,

Brady Willett and Todd Alway
